PFANO SINYELA

ABOUT ME

Diploma in IT Software Development graduate from Rosebank College with a strong foundation in programming, database systems, and software engineering. I am skilled in Java, C#, PHP, Kotlin, SQL, HTML, CSS, Flutter, Firebase, and backend development. I have experience as an Oracle Database Administrator (DBA) and I also have Software Engineererering experience. I am passionate about creating efficient, scalable, and reliable software solutions.

WORK EXPERIENCE

Database Administrator Intern | OptiSolutions — Sep 2025 - May 2026

- Assisted with Oracle database maintenance, monitoring, and user management on Vodacom's Nexio, ODS and CSS databases.
- Performed database patching and supported routine health checks.
- Managed database user accounts, including user creation, password resets, account unlocking, and handling expired or inactive accounts.
- Assisted with database link updates and other routine administrative tasks to support connectivity between database systems.
- Used ticketing and support workflows to track database requests, document completed tasks, and provide first-line technical support.

Software Engineer | Aegar Tech — June 2026 - Present

- Contribute to the development, maintenance, and improvement of software applications.
- Integrate third party services and APIs to support application functionality, including communication and call-handling features.
- Identify, investigate, and resolve application bugs through testing, debugging, and code reviews.
- Use Azure DevOps and GitHub for version control, code management, and collaboration with the development team.
